About Academy

Academy, a sister company of Academic Work, offers intensive training programs based on the Accelerated Learning method in industries experiencing a major skills shortage. Our aim is to prepare and train people with the right skills and ambition to take on new challenges and embark upon new careers.

Academy combines a recruitment process that emphasizes candidates' personal qualities with tailored training packages that have been developed with some of the best teachers in their respective fields. Academy is based in Stockholm and has successfully trained over 2 500 consultants since it was established in 2015.

You can find more information by visiting our website:

Problem-solving ability (GMA)

To succeed in the AW Academy Program and in the role as an IT consultant a high degree of problem-solving ability is required, to quickly take in new information and to utilize it in working contexts that are untested for the consultant.

Competencies

Except problem-solving ability, we are focusing on cooperation, flexibility and a person that is results-oriented which the consultant shows high skills in.

Accelerated learning

AW Academy, a part of Academic Work

C#.NET| Winter22

Adna Stupar has completed Academy's Accelerated learning Program in C#.NET. Accelerated learning is a fast way to a new career for ambitious and driven individuals with the right skills to acquire new knowledge. The education method focuses on high-speed blended learning with a lot of practical work, agile teamwork, and continuous feedback dialogue. The education is always based on specific tasks relevant to the professional role. This makes the learning process extremely efficient, and consultants can contribute as junior IT-consultants from the first day after training.

Projects & Assignments

Quiz Web Application – “I Thought This Was Speed Dating”

During the last two weeks of the C#.NET course I worked on a project with four classmates. We developed a web app where you can choose from six different categories to be quizzed on. We used Entity Framework and the MVC design pattern to build the application.

Previous Work Experience

IT-Support Technician

TietoEvry | March 2022 – September 2022

I worked with technical IT-support at TietoEvry. This included application support, customer support and administration. This job has given me knowledge when it comes to Microsoft Identity Management, Azure, Citrix, AD and much more.

Truck driver

Elektroskandia | 2021 – 2022

For five months I worked with Elektroskandia through Academic Work. During my time at Elektroskandia I got to package deliveries that were going to be sent abroad as well as nationally. My responsibilities were also driving a truck to make sure packages end up in the right place and fast, as well as mounting certain products. The job taught me to be efficient, think logically and be thorough.

Loan Officer

Likvidum | 2022 – 2022

I worked at Likvidum as a loan officer. A job in sales taught me how to be patient, put clients first and how to communicate. On a daily basis I compared clients' current loans and overlooked their financial situation and booked meetings with advisors.

Previous Education

Legal Science Programme with International Approach
Örebro University | 2019 – 2021

Economics program; Specialization Law
Knut Hahn Upper Secondary School | 2016 – 2018
